

What's New in IMACS V5.3...

1. Enhancement – Update Multiple Line Items - Added new Next, Prev, and Find buttons to Line Item Requirements and Line Item Details functions

Applies to Exhibits I, II, III-A, III-B, and IV - You can now use the new **Next, Prev, and Find** buttons within the Line Item Requirements and Line Item Details functions to quickly access line item data, update it, save it, and move on to the next line item without having to return to the main Exhibit window. (Cannot add new line items yet, only update existing line items – in this version)

See Section 14 in online UM

2. Enhancement – Exhibit I/II – Upload Spreadsheets – Added new capability to upload Exhibit I and II data for multiple DMISAs and line items - within the IMACS application - using the Exhibit I or II downloaded spreadsheets.

See Section 14.16 and 14.17 in online UM for Exhibit I/II Download and Upload functions.

3. Enhancement – Exhibit X-B Download Spreadsheet - Added new capability to download Exhibit X-B data into spreadsheet format.

Users can do this by two methods:

- a. Accessing Exhibit X-B within the DMISA and use **Download** button – for one spreadsheet at a time – for that DMISA, TAB, and selected MIPR/PO.
- b. Or, from IMACS Main Menu, under Spreadsheets/X-B Download function – can request multiple DMISAs/TABs in one request, which will be emailed to you in a zipped file that includes all appropriate funded and unfunded line item files.

See Section 28 in online UM

4. Regulation Change – Title Page/Signature Page

- a. Agent MISOs can add or update signature lines for new Depot Commander.
- b. Also, the Signature Date field is no longer a mandatory entry. It can either be left blank, or, it can be added or updated, when necessary.

See Section 11.3 in the online UM.

5. Corrected Trouble Ticket Reports for the following functionality:

- a. Corrected Title Page where user could not update the title, previous DMISA, or Organization without getting an erroneous message.
- b. Corrected the DMISA List Report where it was erroneously printing either a blank or '01 JAN 01 instead of the proper End Date.
- c. Corrected Global Shipping Instructions list to be displayed in the order of: Owner Dodaac, Supplementary Dodaac, From Routing Identifier, SOS Routing Identifier, and Purpose Code.
- d. Corrected Transaction Mismatches where some of the transaction mismatches list was not displayed after returning from the Details windows.
- e. Corrected Transaction Mismatches where the printed report did not match the online listing of Transaction Mismatches.
- f. Corrected Transaction Mismatches where the D6 transaction showed zeros instead of the Julian Date within the transaction.
- g. Corrected Long Range Support (Formats 1, 2, 3, and 4) for formatting and field display problems.
