

What's New in IMACS V5.2...

1. Enhancement – Transaction Rule Relaxation - Phase II – ASSET VISIBILITY

MY Mismatches and Generated Shipping Instructions– Business rules have been refined to address records related to Multiple Line Items in Numerous DMISA Fiscal Years (MY) situations.

To aid in posting shipping transaction records, IMACS now automatically generates a global shipping instruction as well as an Exhibit XIII Part I or Part II special shipping instruction based on the direction of the asset indicated in the interface data feed's transaction record.

2. Enhancement – SDS Special Processing changes –ASSET VISIBILITY

Implemented prior to V5.2 – effective 10/14/02 – Special processing programs address the control number suffix issues to aid in posting production data from SDS.

3. Enhancement – DSS Balance Data –ASSET VISIBILITY

Implemented prior to V5.2 – effective 8/14/02 – DSS inventory Balance data being received in IMACS from 9 co-located DSS sites. Implemented special pre-processing programs that filter out non-Inter-service balance data sent from DSS. Improves posting of balance data.

4. Improvement – Ability to generate PDF, HTML, or RTF formats from IMACS reports.

**Refer to Section 46.9 in the online UM.

5. Corrected Trouble Ticket Reports for the following functionality:

- a. Corrected situation where NAVICP-M and NAVICP-P users could not view posted Balance or Production data
- b. Improved Asset Balance by DMISA/NIIN and Maintenance Production by DMISA/NIIN functions to work more efficiently. Simplified DMISA and TAB selection; improved scrolling for TABs and Line Items; improved response time.
- c. Corrected situation where users could not get Asset Balance by DMISA/NIIN report of posted Balance data for selected DMISA, FY, and TAB.
- d. Corrected situation where users could not print Exhibit XIII Part I or Part II shipping instructions if no ownership code was entered. Now, all shipping instruction fields print.
- e. Corrected situation where selected Production Mismatches viewed/printed report data matched data shown in online function (implemented 1/8/02).
