

# Power Platform: Everyone's platform for transformation

## No Code

Drag and drop experiences that are like PowerPoint

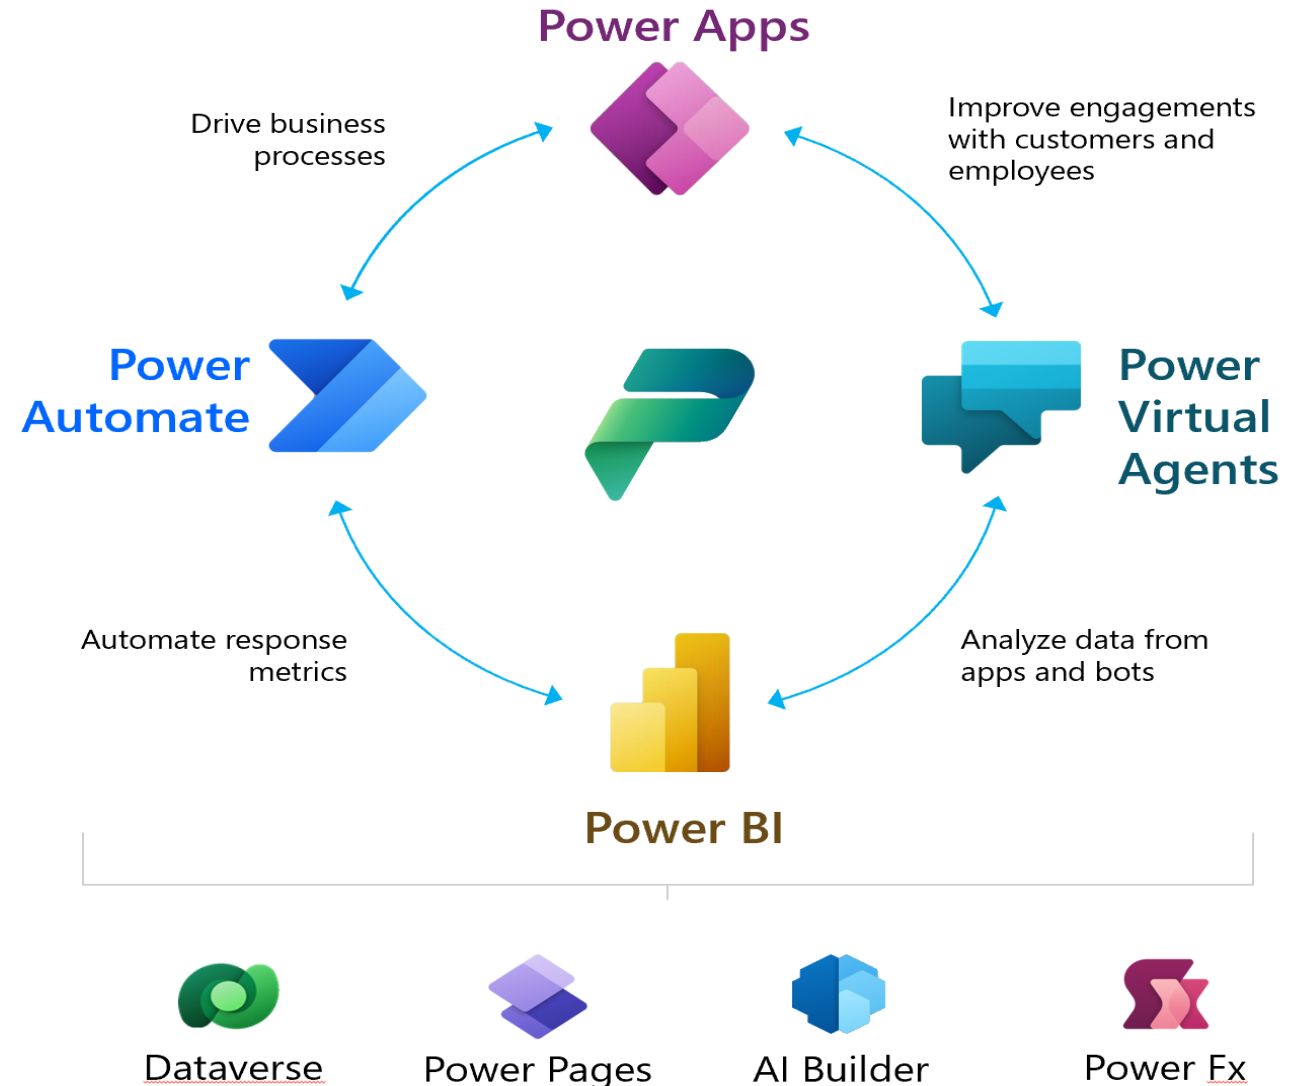

## Low Code

Drag and drop plus Excel-like formulas for functionality

## Code First

Professional development and extensibility across Microsoft

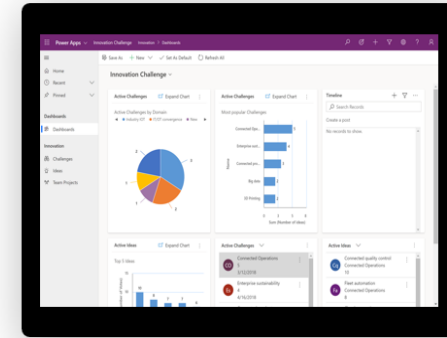

## Power Apps

Empower everyone to create apps

- Use Power Apps to rapidly create web and mobile front ends using a drag and drop UI.
- Build once and deploy apps in one click across iOS, Android, Windows, and Web.
- Customize every detail of an app to optimize for specific tasks, roles, and industries.
- Enable pro developers to create re-usable components to share with citizen developers.
- Connect to data using pre-built or custom connectors.

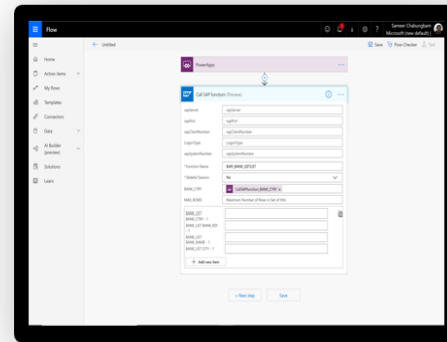

## Power Automate

Automate business processes across Power Platform

- Expand and improve business processes with integrated RPA workflows.
- Send automatic reminders for past due tasks.
- Move business data between systems on a schedule.
- Connect to over 300 other data sources or any publicly available API.
- Create a flow once and enable makers to use it across the Power Platform.

## Power BI

AI infused experiences with the familiarity of Office

- Enable everyone to create real time dashboards & interactive reports using low-code tools and pre-built formats.
- Empower end-users to explore and personalize visuals based on their unique needs.
- Add dynamic, interactive narratives to reports with the flexibility to edit language and format.
