

NO DRONES *and* **UNMANNED AIRCRAFT**

Launching, Landing or Operating Unmanned,
or Remote Controlled Aircraft/Drones is
PROHIBITED* on Hill AFB at all times.

Please report all activity to Security Forces
at 801-777-3056

*If you are an owner, for off-base use and regulations,
see reverse side

Additional details and important links are found at www.faa.gov/uas/

Unmanned Aircraft Systems (UAS)

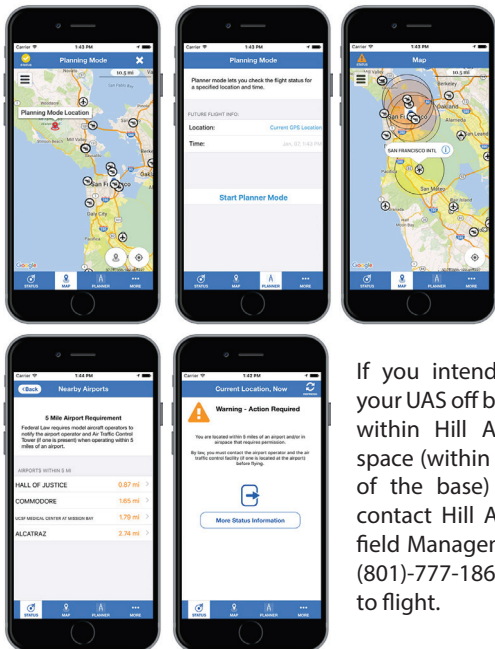

Whether you're a novice drone pilot or have many years of aviation experience, it's important you know the latest information and requirements to safely and legally operate your recreational or commercial UAS.

PILOT INFORMATION

There are requirements and processes to become a pilot. The website www.faa.gov/uas has all the information and links needed to walk you through the process, whether you're a first time pilot or existing pilot.

B4UFLY is an easy-to-use free smartphone app that helps unmanned aircraft operators determine in real time whether there are any restrictions or requirements in effect at the location where they want to fly. Below are sample screen shots.

If you intend to fly your UAS off base but within Hill AFB airspace (within 5 miles of the base) please contact Hill AFB Airfield Management at (801)-777-1861 prior to flight.

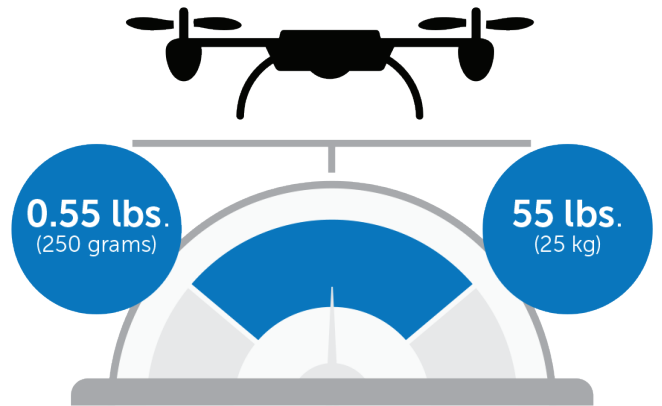

AIRCRAFT REQUIREMENTS

2 Options for Flying Your Drone

There are two options to fly your drone legally. Each option has different requirements depending on how you want to fly. Visit www.faa.gov/uas/getting_started/ to find out.

REGISTRATION

Register your aircraft at <https://faadronezone.faa.gov/#/> if it weighs more than 0.55 lbs. (250 grams) and less than 55 lbs. (25 kg).

You will be subject to civil and criminal penalties if you fail to meet the criteria to register an unmanned aircraft and do not register an UAS.

**The responsibility is yours
Be Safe. Be Legal.**
